🎤 Introduction Script

"Good morning everyone,
My name is **Deepak [Your name]**, and today I am going to present my project titled **'Krashi Bajar'**.

This project is designed as a digital marketplace that connects **farmers** directly with **customers**. The platform provides two types of logins—one for farmers and one for customers—both with their own registration and dashboards.

- **Farmers** can add, edit, or delete products, view product lists, manage orders, cancel orders, and update order status.
- **Customers** can maintain their details, view their order list, cancel orders, and track order status.

On the common website, all products are displayed with images and details. Customers can easily browse, click the **'Buy Now'** button, fill in their information, and purchase directly from farmers.

The goal of this project is to create a transparent, user-friendly system that benefits both farmers and customers by promoting fair trade and convenience."

🌾 Project Presentation: Krashi Bajar

1. Introduction

- **Project Name:** Krashi Bajar
- **Objective:** To connect farmers directly with customers through a digital marketplace.
- **Problem Statement:** Farmers often struggle to reach customers directly, while customers face challenges in accessing fresh produce at fair prices.
- **Solution:** A common platform with separate dashboards for farmers and customers, ensuring transparency, convenience, and efficiency.

---

2. System Overview

- **Common Website:**
  - Homepage displays all available products with images, details, and a **"Buy Now"** button.
  - Login/Registration options for both farmers and customers.
  - Secure authentication system.
- **Two Types of Users:**

1. **Farmer**
2. **Customer**

---

3. Farmer Dashboard Features

- **Product Management:**
  - Add new product (name, price, image, description).
  - Edit product details.
  - Delete product.
  - View product list.
- **Order Management:**
  - View orders received.
  - Cancel orders if needed.
  - Update order status (e.g., pending, shipped, delivered).

---

4. Customer Dashboard Features

- **Profile Management:**
  - Customer details (name, contact, address).
- **Order Management:**
  - View order list.
  - Cancel orders if required.
  - Track order status.

---

5. Website Features

- **Product Display:**
  - All products visible to customers with images and details.
  - “Buy Now” button to purchase.
- **Purchase Flow:**
  - Customer clicks “Buy Now.”
  - Fills in required details (quantity, address, payment method).
  - Order confirmation generated.

---

6. Benefits

- **For Farmers:**
  - Direct access to customers.
  - Better price control.
  - Easy product management.
- **For Customers:**

    - Fresh produce directly from farmers.
    - Transparent pricing.
    - Easy ordering and tracking.

---

7. Technology Stack (suggested)

- **Frontend:** HTML, CSS, JavaScript, Angular/React.
- **Backend:** Node.js / PHP / Django.
- **Database:** MySQL / MongoDB.
- **Hosting:** Cloud-based (AWS, Azure, or local server).

---

8. Conclusion

- Krashi Bajar bridges the gap between farmers and customers.
- Promotes fair trade, transparency, and convenience.
- A scalable solution that can expand to multiple regions.
